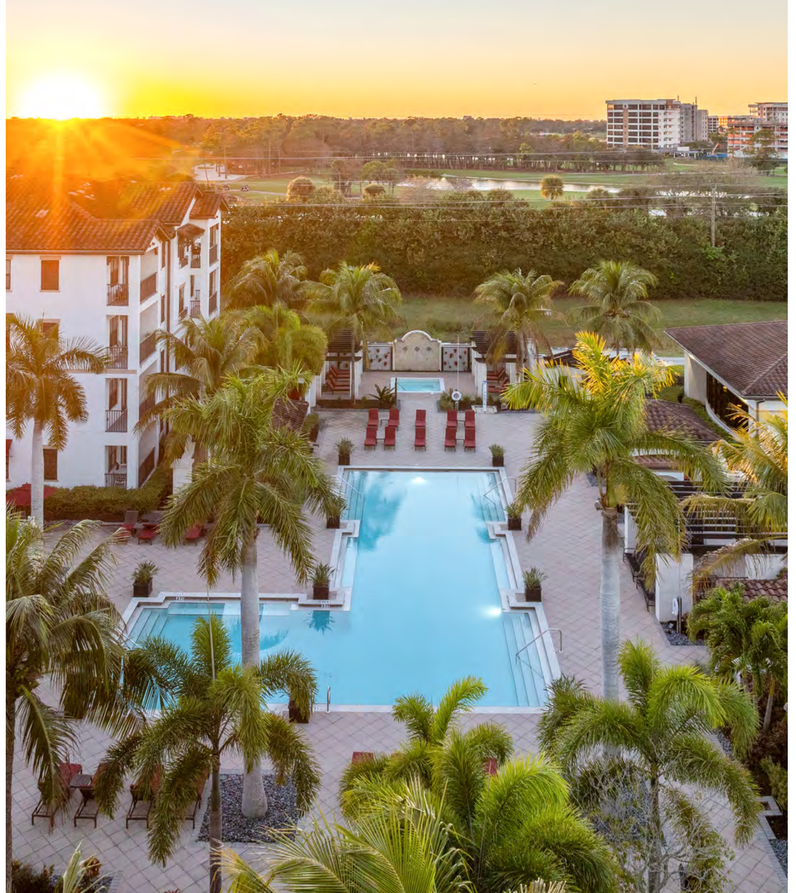
Orchid Run



Executive Summary

CARDONE CAPITAL

Executive Summary

Cardone Capital is pleased to present Orchid Run, a 2015-vintage, luxury apartment community located adjacent to the prestigious Grey Oaks neighborhood of Naples, Florida. Nestled among high-end estates in one of the nation's most affluent enclaves, Orchid Run combines a sophisticated, Mediterranean-inspired aesthetic with immediate access to Naples' premier commercial, employment, and recreational nodes. Solid concrete construction, classic barrel tile roofs, and a market-leading clubhouse—one of the largest in the submarket—position Orchid Run as a top-tier residential asset.

Strategically situated in the supply-constrained Central Naples corridor, the Property offers a high-quality living experience characterized by durability and timeless design. Residents enjoy a resort-caliber lifestyle featuring a rich suite of amenities, all while being minutes away from world-class dining, boutique retail, and the Gulf's white-sand beaches. This institutional-grade asset stands out not only for its physical quality but also for its significant "rent-versus-own" advantage, as local home values continue to soar, pricing out all but the wealthiest buyers and reinforcing the Property's appeal to lifestyle-driven, renter-by-choice residents.

Orchid Run is positioned for value enhancement through a unit renovation program, with nearby assets achieving substantial rent premiums despite inferior locations. Furthermore, the Property sits at the heart of a dynamic economic hub, benefiting from Naples' evolution into a destination for major corporations like Arthrex and ACI Worldwide. With robust demographic growth in the primary renter age cohorts and a significant opportunity to capture the lucrative "snowbird" seasonal market, Orchid Run represents an exceptional opportunity to acquire a high-performing asset with multiple exit strategies, including potential condominium conversion, in one of the most desirable coastal markets in the United States.

Investment Highlights

01 Superior Central Naples Location & Scarcity Value

Located in the coveted in-fill Central Naples submarket where developable land is scarce. **Only one other garden property has been developed within a 3-mile radius in the last 10 years,** providing a "moat" against new supply and ensuring durable cash flow.

02 High-Quality, Timeless Mediterranean Design

Constructed with solid concrete and durable barrel tile roofs, the Property is built to last. The expansive, resort-style clubhouse and rich amenity suite elevate the resident experience beyond conventional apartment living.

03 Potential Value-Add Upside

Current rent-to-income ratios indicate significant headroom for growth. **By updating unit interiors to match modern luxury standards, there is an opportunity to capture significant rent premiums** currently being achieved by newer, less-favorably located assets.

04 Enormous Discount to Home Ownership

High residential prices in the immediate vicinity create a massive barrier to entry for homeownership. Residents save thousands per month compared to the cost of a mortgage, further bolstering the affluent renter profile of the community.

05 Explosive Demographic & Economic Growth

The Naples MSA is one of the wealthiest in the U.S. and is home to major employers like Arthrex, ACI Worldwide, and Beasley Broadcast Group. **The primary renter demographic (ages 21-40) has grown by ~16% over the last five years,** fueled by migration from the North and Southeast Florida.

06 Robust Post-Supply Wave Recovery

Following a wave of new regional supply, Orchid Run is showing strong momentum heading into 2026. **Renewal rates have increased by 4.4% since the start of the year, with resident retention holding steady at nearly 55%.**

The Naples Lifestyle

Interior Renovation Opportunity

Targeted Unit Renovations

Current rent-to-income ratios indicate significant headroom for growth. By updating unit interiors to match modern luxury standards, there may be an opportunity to capture substantial rent premiums similar to those currently being achieved by newer, less-favorably located assets.

Premium Market Enables Sustained Rent Growth

Florida: Leading U.S. Net Migration

Florida's warm climate, business-friendly environment, high quality of life, and low tax burden have made it a top destination for residents relocating from other states. Since 2020, Florida has led the nation in net migration, adding nearly 2 million new residents—second only to Texas in total growth over the same period. The state has also recorded the highest percentage population increase over the last three years. In 2023, 2024 and 2025, CNBC ranked Florida as the #1 state economy, and given these advantages, it is expected to continue experiencing rapid population growth for the foreseeable future.

Strong Job Metrics

Naples is poised to benefit substantially from Florida's broader economic expansion. Office fundamentals are strong: average market office rents have surpassed $34 per square foot, while vacancy has settled at ~8%, signaling a healthy leasing environment.

An influx of wealth into the area has helped position Naples as an attractive destination for corporate headquarters and regional offices. Companies such as Ametek, Arthrex, and ASG Technologies are among those expanding or establishing operations in the region. This momentum highlights Naples' rising profile as a business hub, supported by pro-growth economic conditions and an exceptional quality of life.

Submarket Performance

Following an exceptional post-COVID rent surge of 39% in 2021, Central Naples experienced a slowdown in 2023 and 2024, similar to much of Southwest Florida. From 2027 to 2030, the average of yardi, RealPage and Costar forecasts calls for rent growth to average 3.2%. This strong outlook underscores the continued desirability of the Central Naples submarket and points to a favorable performance trajectory in the years ahead.

Rent vs. Buy Gap

Although Naples has been recognized by U.S. News as one of the best cities to live in, it remains out of reach for many prospective homeowners. In the area surrounding Orchid Run, single-family homes average approximately $1.4M, nearly double Collier County's median price. By contrast, renting at a luxury community like Orchid Run enables residents to enjoy the coveted Naples lifestyle while avoiding some of the highest home prices in the nation. At current values, the average monthly payment for a single-family home at this price point translates to nearly $7,000—almost 3x the average monthly rent at Orchid Run.

NAPLES PIER

The **Naples Pier,** originally built in 1888, was one of the most visited attractions in SW Florida, **drawing over 1 million annual visitors**. Plans also include better public bathrooms, plus private ones for police. **Construction is estimated at $26 million** and expected to take 20-24 months to complete. As of midSeptember 2025, the city was waiting on the final approval and official permit from the Army Corps of Engineers.

ABSORPTION / DELIVERIES

Naples, at the southern end of Southwest Florida, remains one of the state's most affluent apartment markets. Household incomes trend above the national average and are expected to grow faster than U.S. norms, **supported by high-net-worth retirees and in-migration of higher-earning households. The metro's demographics skew older than both the state and the nation**, while a substantial share of the workforce is concentrated in lower-wage service, retail, and hospitality roles that support its tourism-driven economy, creating a wide range of housing needs from luxury to workforce product.

On the supply side, Naples has been in an extended period of elevated construction. Since 2019, the market has averaged just under 1,000 new units delivered annually, with new supply increasing from under 800 units in 2019 to more than 1,000 units in both 2024 and 2025; **2025 was the busiest year on record with 1,196 units delivered. Looking ahead, about 870 units are projected to deliver in 2026**, indicating that while the market is likely past its recent high-water mark for new construction, deliveries will remain above long-term norms in the near term.

Demand has moved in pronounced cycles against this backdrop. Net absorption surged to more than 2,000 units in 2021 on the back of strong in-migration, then moderated sharply in 2022–2023 as the market digested prior new supply and navigated the disruption associated with Hurricane Ian and broader economic uncertainty. Conditions improved in 2024, when absorption rebounded to roughly 1,350 units and outpaced that year's deliveries. **In 2025, demand remained positive but more measured, with 576 net move-ins**. Forecasts for 2026 call for absorption of roughly 890 units—close to both expected new supply and the five-year average of about 800 units—pointing to a more balanced, sustainable relationship between construction and underlying renter demand.
